

DIVERSE

INTEGRATION OF BIO**DIVERSITY** CONSERVATION WITHIN BIO**ENERGY** PRODUCTION

BIOMASS CAN BE A SUITABLE ENERGY OPPORTUNITY FOR THE ALPS. **DIVERSE** IS FOCUSED ON ENHANCING ENERGY DIVERSIFICATION BY INTEGRATING BIOMASS WITH SUSTAINABILITY AND BIODIVERSITY CRITERIA.

THE PROJECT PROVIDES A BROADER OVERVIEW OF ALPINE AREA'S BIOMASS RESOURCES, WEAKNESSES FOR USAGE AND SUSTAINABLE VALUE CREATION FOR THE VALORISATION OF LIFE-SUSTAINING BIOENERGY PATHWAYS IN THE ALPINE AREA AND BEYOND.

STRENGTHENING COOPERATION BETWEEN ENERGY AND NATURE STAKEHOLDERS THROUGH AN OPEN DIALOGUE AND A TOOLKIT THAT HELPS COMMUNITIES INTEGRATE BIODIVERSITY AND SUSTAINABILITY INTO EARLY ENERGY PLANNING

INTEGRATING NATURE PROTECTION INTO BIOENERGY POLICY INSTRUMENTS, AGRO-ECOLOGY AND FOREST MANAGEMENT, SUPPORTING SELF-SUFFICIENCY AND CIRCULARITY IN ALPINE ENERGY COMMUNITIES AND BIOENERGY SYSTEMS

September 2024 – August 2027
ERDF Co-Funding: €2.107.336,12

ACCELERATING THE TRANSITION TO A LOW-CARBON ENERGY SOURCE MIX

PROJECT OUTPUTS

DIVERSE OPEN DIALOGUE TOOLKIT

Set of tools to support open discussion in the Focus Lab combined with a roadmap for the improvement of regional bioenergy sustainability.

DIVERSE PILOT: A PATH TOWARDS SUSTAINABLE & BIODIVERSITY-POSITIVE BIOENERGY ROUTES

Transnational pilot testing the Open Dialogue Toolkit through the Focus Labs, and set up of policy measures, management practices and energy models.

ALPINE TRAJECTORIES FOR SUSTAINABLE & BIODIVERSITY-POSITIVE ENERGY ROUTES

Three guidelines-modules to help integrate nature/biodiversity protection, improve regional sustainability and implement circular business models.

*Join us in creating a future where energy efficiency meets biodiversity conservation.
Be part of the solution to a greener, low-carbon Alpine region.*
